## Contents

### Computational Models of Neurological Disorder

*Edited by William Lytton and Sam Neymotin*

Multiscale modeling for drug discovery in brain disease S.A. Neymotin and W.W. Lytton .....	1
Virtual Brain for neurological disease modeling C. Bernard and V. Jirsa .....	5
Computational Drug Networks: a computational approach to elucidate drug mode of action and to facilitate drug repositioning for neurodegenerative diseases F. Sirci, Sirci1, F. Napolitano and D. di Bernardo.....	11
Computational modeling to improve treatments for essential tremor S. Lee, W.F. Asaad and S.R. Jones .....	19
Computer modeling of epilepsy: opportunities for drug discovery W.W. Lytton.....	27
Computational modeling to advance deep brain stimulation for the treatment of Parkinson's disease A.B. Holt and T.I. Netoff .....	31
Capturing intracellular Ca <sup>2+</sup> dynamics in computational models of neurodegenerative diseases H. Anwar.....	37
Modeling neurological disease processes using process algebra T.J. Anastasio.....	43
Computer modeling for pharmacological treatments for dystonia S.A. Neymotin, S. Dura-Bernal, H. Moreno and W.W. Lytton .....	51
Modeling cytokine regulatory network dynamics driving neuroinflammation in central nervous system disorders W.D. Anderson and R. Vadigepalli .....	59
The use of dynamic computational models of neural circuitry to streamline new drug development J.E. Arle and K.W. Carlson .....	69
Computer modeling of ischemic stroke A.J.H. Newton and W.W. Lytton .....	77
Multiscale models of pharmacological, immunological and neurostimulation treatments in Alzheimer's disease V. Cutsuridis and A.A. Moustafa .....	85
